PSAV TO AAS/AS DEGREES

Faculty and academic administrators working in certain areas of career and technical education (CTE) throughout the country are familiar with "bridge programs" that allow students to convert certain course work taken in non-credit CTE programs into college credits. Articulation agreements allowing for vertical or lateral entry into nursing programs are extremely common, with institutions generally awarding credit to students whose non-credit training as paramedics or practical nurses duplicates entry-level learning outcomes. Such arrangements occur only after careful review of learning outcomes and student assessments by faculty in the receiving program, and often entail joint faculty work to ensure curriculum alignment. For statewide adoption, recommendations are subject to approval by the cross-sector ACC.

The State Board of Education approved the listed Statewide Career and Technical Education Articulation Agreements. This supports the Department's Next Generation Areas of Focus —"to expand opportunities for postsecondary degrees and certificates." These agreements are intended to be a minimum guarantee of articulated credits. Listed below is a chart of NWFSC courses that credit can be received for. For a listing of specific statewide ATD to AAS/AS articulation agreements approved by the ACC, see: ATD to AS and AAS Articulation Agreements.
